

Free Inspections and Free Estimates

Elevation Restoration's licensed, certified inspectors will perform a full investigative inspection to determine the condition of your entire roof system, gutters, siding, windows, etc. Based on the findings, we can determine if repairs are needed at this time. If damage is found we can recommend the best course of action.

Determining the type and the extent of damage will determine if an insurance claim should be made. A sufficient amount of damage should be found BEFORE filing a claim with your insurance company. If a claim is made and sufficient damage is NOT found, the claim is still recorded with most insurance companies.

Free Estimates

Elevation Restoration uses *Xactimate*[™], the #1 property claims estimating software solution available. *Xactimate*[™] provides all the current pricing used by insurance companies so we can insure you receive the full amount due for your loss. *Xactimate*[™] pricing is updated every month and based upon geographical regions by zip code to make sure that each estimate is correct for each market.

We will provide a full detailed estimate. All estimates describe the products and the area where each product will be installed on your home. We will explain/discuss the installation process and the advantages and options of all products used in the installation of your home.
